

ROSCon 2015 Sponsorship Opportunities

October 3-4, 2015
Hamburg, Germany

We are pleased to announce ROSCon 2015, the fourth annual ROS developers' conference, to be held immediately following IROS on October 3-4, in Hamburg, Germany. We are building on the success of previous editions of ROSCon, which brought together 200-300 robotics entrepreneurs, vendors, students, and enthusiasts. This year's two-day conference will comprise technical talks that introduce and explain how to use libraries and tools, describe best practices, and share techniques.

With the wide and increasing adoption of ROS throughout the robotics community and with advanced robotics technology moving from the lab to commercial and toward home use, the engineering principles behind the systems we build are ever more critical. We hold ROSCon to provide a venue for addressing these issues and educating each other about best practices, new techniques, and novel results. ROSCon continues to be the only forum for discussion of the engineering of robotics systems.

We invite you to sponsor ROSCon 2015 as we explore advancement in technology in this exciting and fast-paced industry. In return, you'll have an opportunity to connect with the ROS community in a variety of ways, from having your logo on the event website to exhibiting your work in person at ROSCon 2015. Our sponsors are recognized before, during, and after the conference as leading supporters of ROS, helping to accelerate progress in our field.

The opportunities listed are designed to fit a variety of budgets. We are happy to tailor benefits to suit your goals—please let us know if you have a unique sponsorship opportunity in mind. Regardless of your participation, we would be extremely happy for you to join us at ROSCon!

Detailed information on the conference is available at <http://roscon.ros.org>.
