# Unleashing the GIS Toolbox on Real-Time Robotics

Andrew Blakey  
ROSCon 2018  
Madrid, Spain

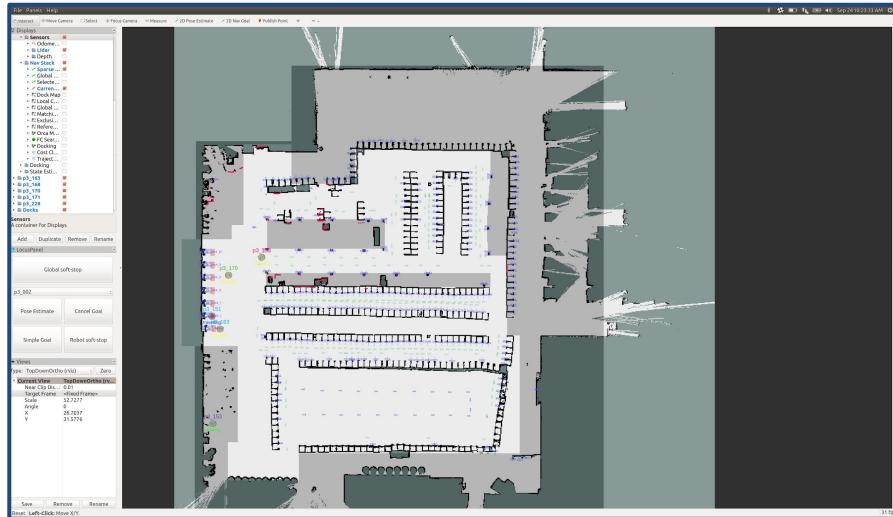

# Spatial Analysis in Mobile Robotics

- Understand real-time and historical state of an environment
- Explore spatial relationships
- Generate higher order datasets
- Communicate results

# RVIZ for Spatial Analysis

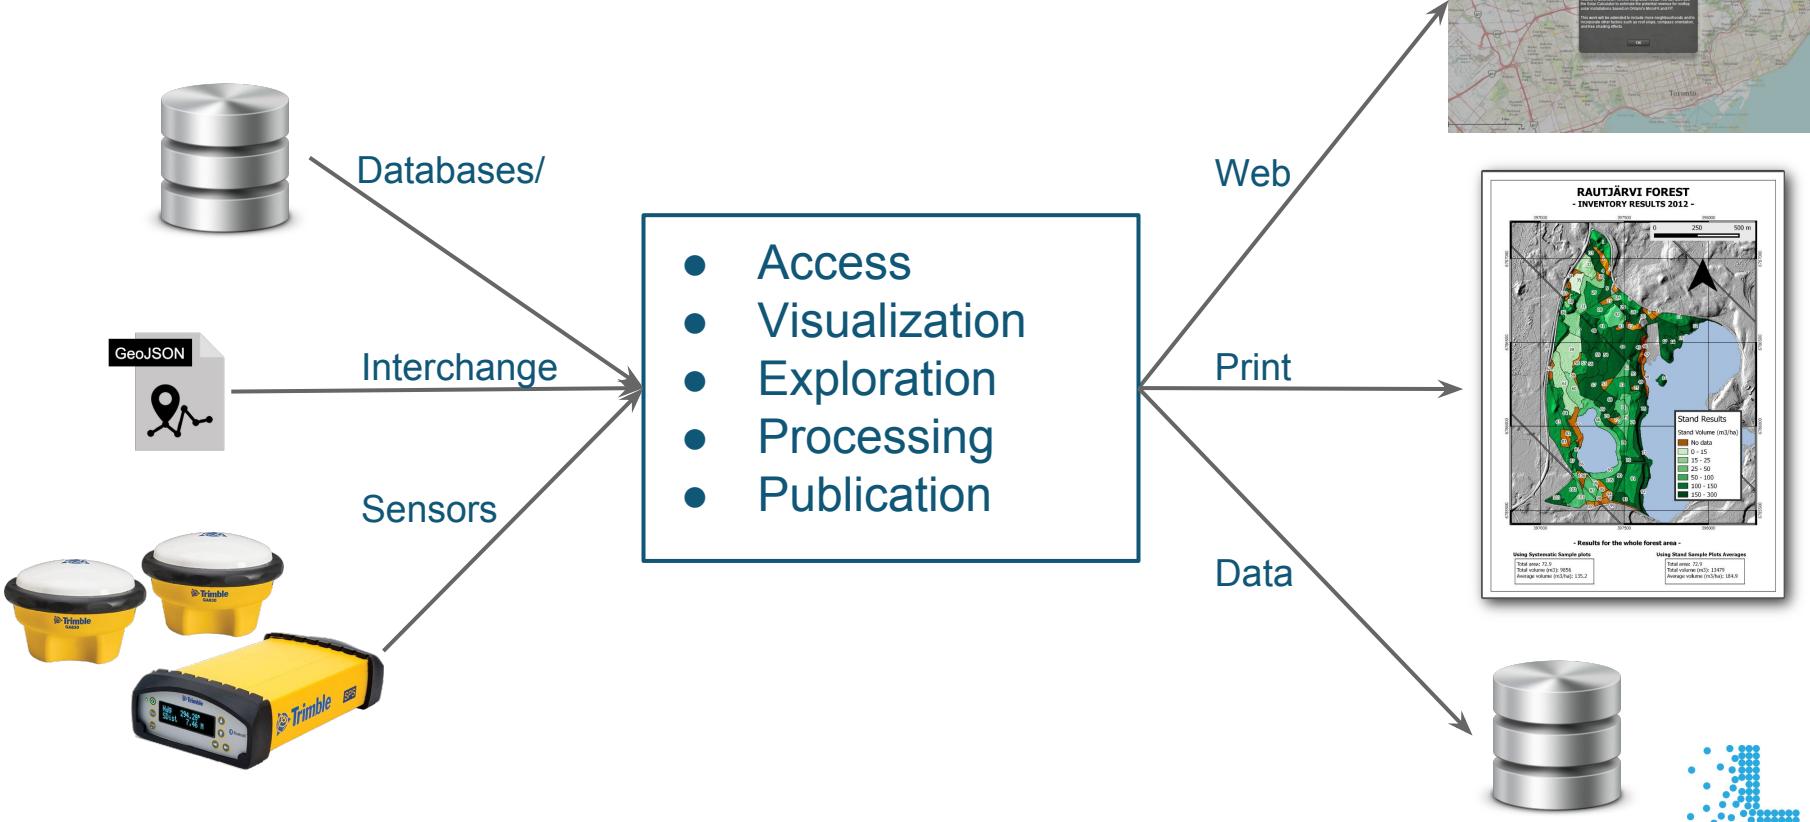

- Data exploration is expensive
  - RVIZ plugin development
  - Custom data processing nodes
- Visualization can be clumsy
  - Eg. republish data in a label-friendly format
- Sharing results is not first-class
  - Screen image/video capture

# Let's use GIS!

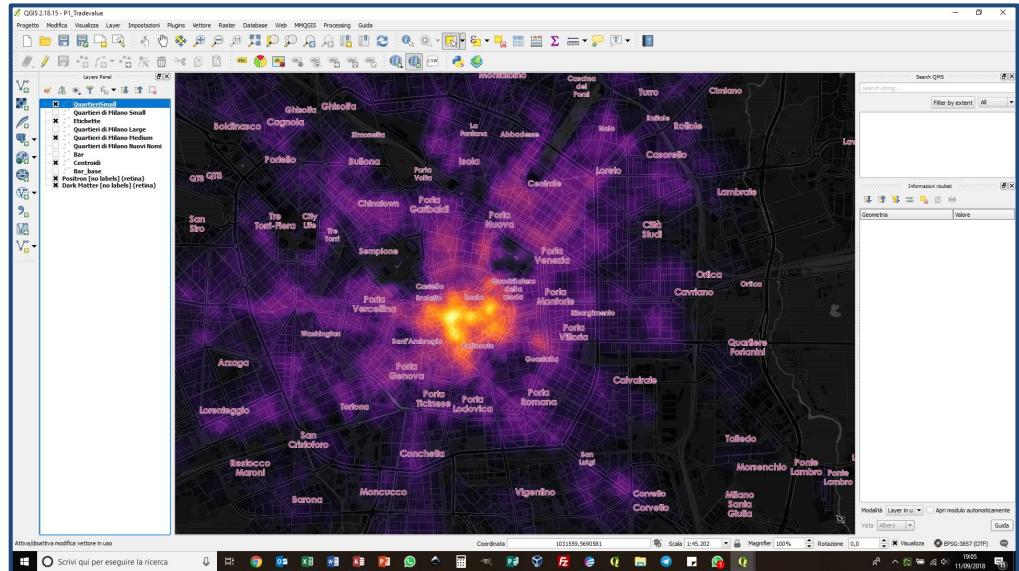

# What is a Geographical Information System (GIS)?

# What is QGIS?

- Open Source
- Linux, Windows, MacOS
- Qt4, Qt5
- C++ API
- Python API Bindings
- Plugin based
- Initial Release: 2002
- <https://www.qgis.org>

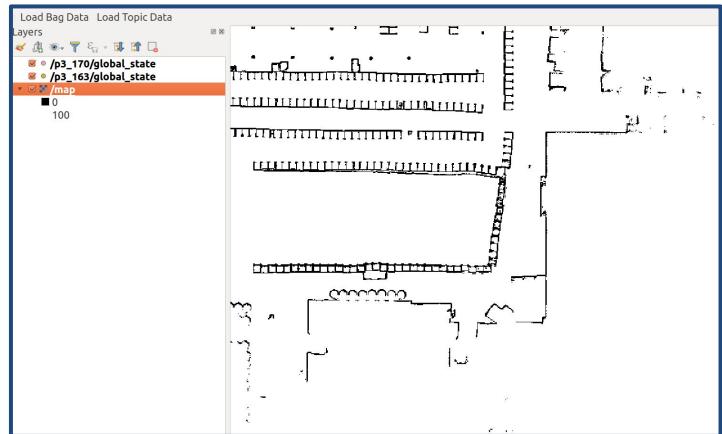

Source: Flickr/city-planner

# Introducing QGIS-ROS

- QGIS Plugin
- Access **live** and **bagged** ROS data
- Supports vector, raster, non-spatial layers
- Supports custom message types by implementing `Translator` subclasses.
- [github.com/locusrobotics/qgis\\_ros](https://github.com/locusrobotics/qgis_ros)

The screenshot shows the 'Load Bag Data' dialog box. At the top, it displays the path 'Bag: /home/ablakey/Downloads/old\_downloads/locus-p3\_354\_2018-07-19-19-08-23\_0.bag' and a red 'Unload Bag' button. Below this is a table listing ROS topics:

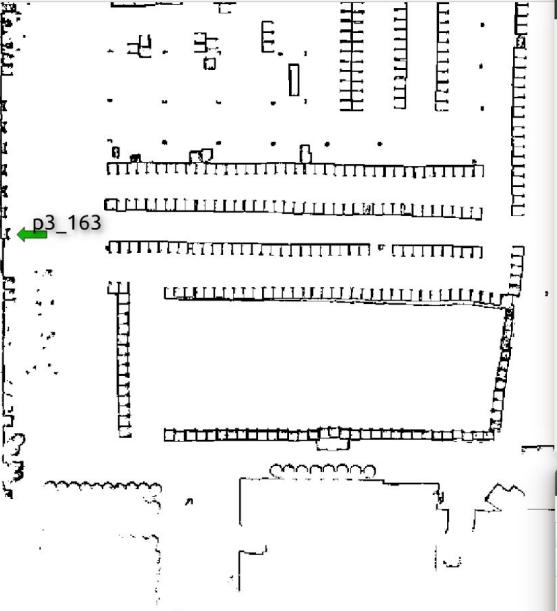

Topic Name	Message Type	Data Type	Count
/map	nav_msgs/OccupancyGrid	Raster	1
/nogo_map	nav_msgs/OccupancyGrid	Raster	1
/p3_354/dock_map	nav_msgs/OccupancyGrid	Raster	1
/p3_354/mobile_base_controller/odom	nav_msgs/Odometry	Vector	56708
/p3_354/move_base/current_goal	geometry_msgs/PoseStamped	Vector	31
/p3_354/odom	nav_msgs/Odometry	Vector	29247
/p3_354/odom_global	nav_msgs/Odometry	Vector	29189
/p3_354/odom_scan	nav_msgs/Odometry	Vector	3673

Below the table are 'Options' settings: 'Take All' (radio button selected), 'Take Last', and 'Take Sample'. There is also a 'Sample Interval:' input field set to '1' and an 'Add Layer' button.

## Example 3: Analyze Non-Spatial Data

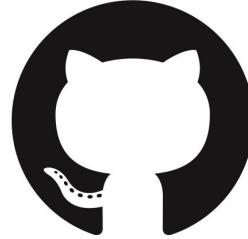

# Future Work...

- Better documentation, examples, sample data
- Map Frame -> World Frame using map projections
- Publish data into ROS environment
- Performance improvements for high volume data
- ROS2 support

...Collaboration Welcome!

# Thank you.
