

ROSBag2nuScenes: Share the Bags, Spread the Joy - Autonomous Vehicle ROS Datasets Deploy

John ChROSniak and Madhur Behl

Computer Science
University of Virginia

John Chrosniak

- Graduate Student at the University of Virginia
- Advised by Dr. Madhur Behl
- Researching the Intersection of Machine Learning and Vehicle Dynamics Modeling
- Graduating in December

Cavalier Autonomous Racing
Perception Team Lead

Autonomous Vehicles Research

nuScenes is Widely Used

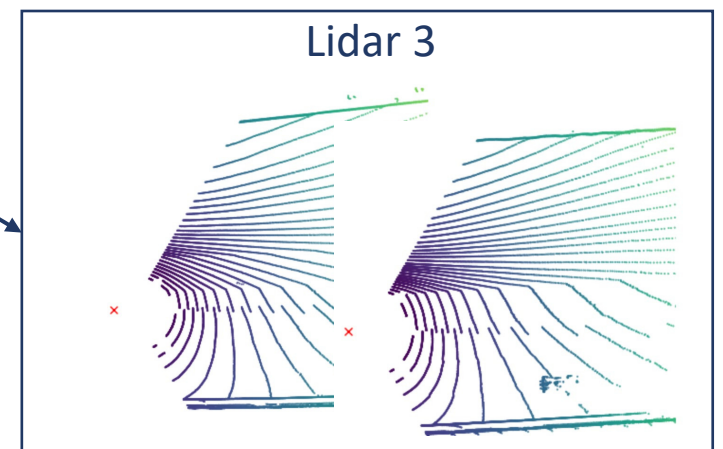

12 May, 2023
3D occupancy prediction challenge at CVPR 2023
A collaboration by Shanghai AI Lab, Tsinghua MARS Lab and Motional (image from "Scene as Occupancy")

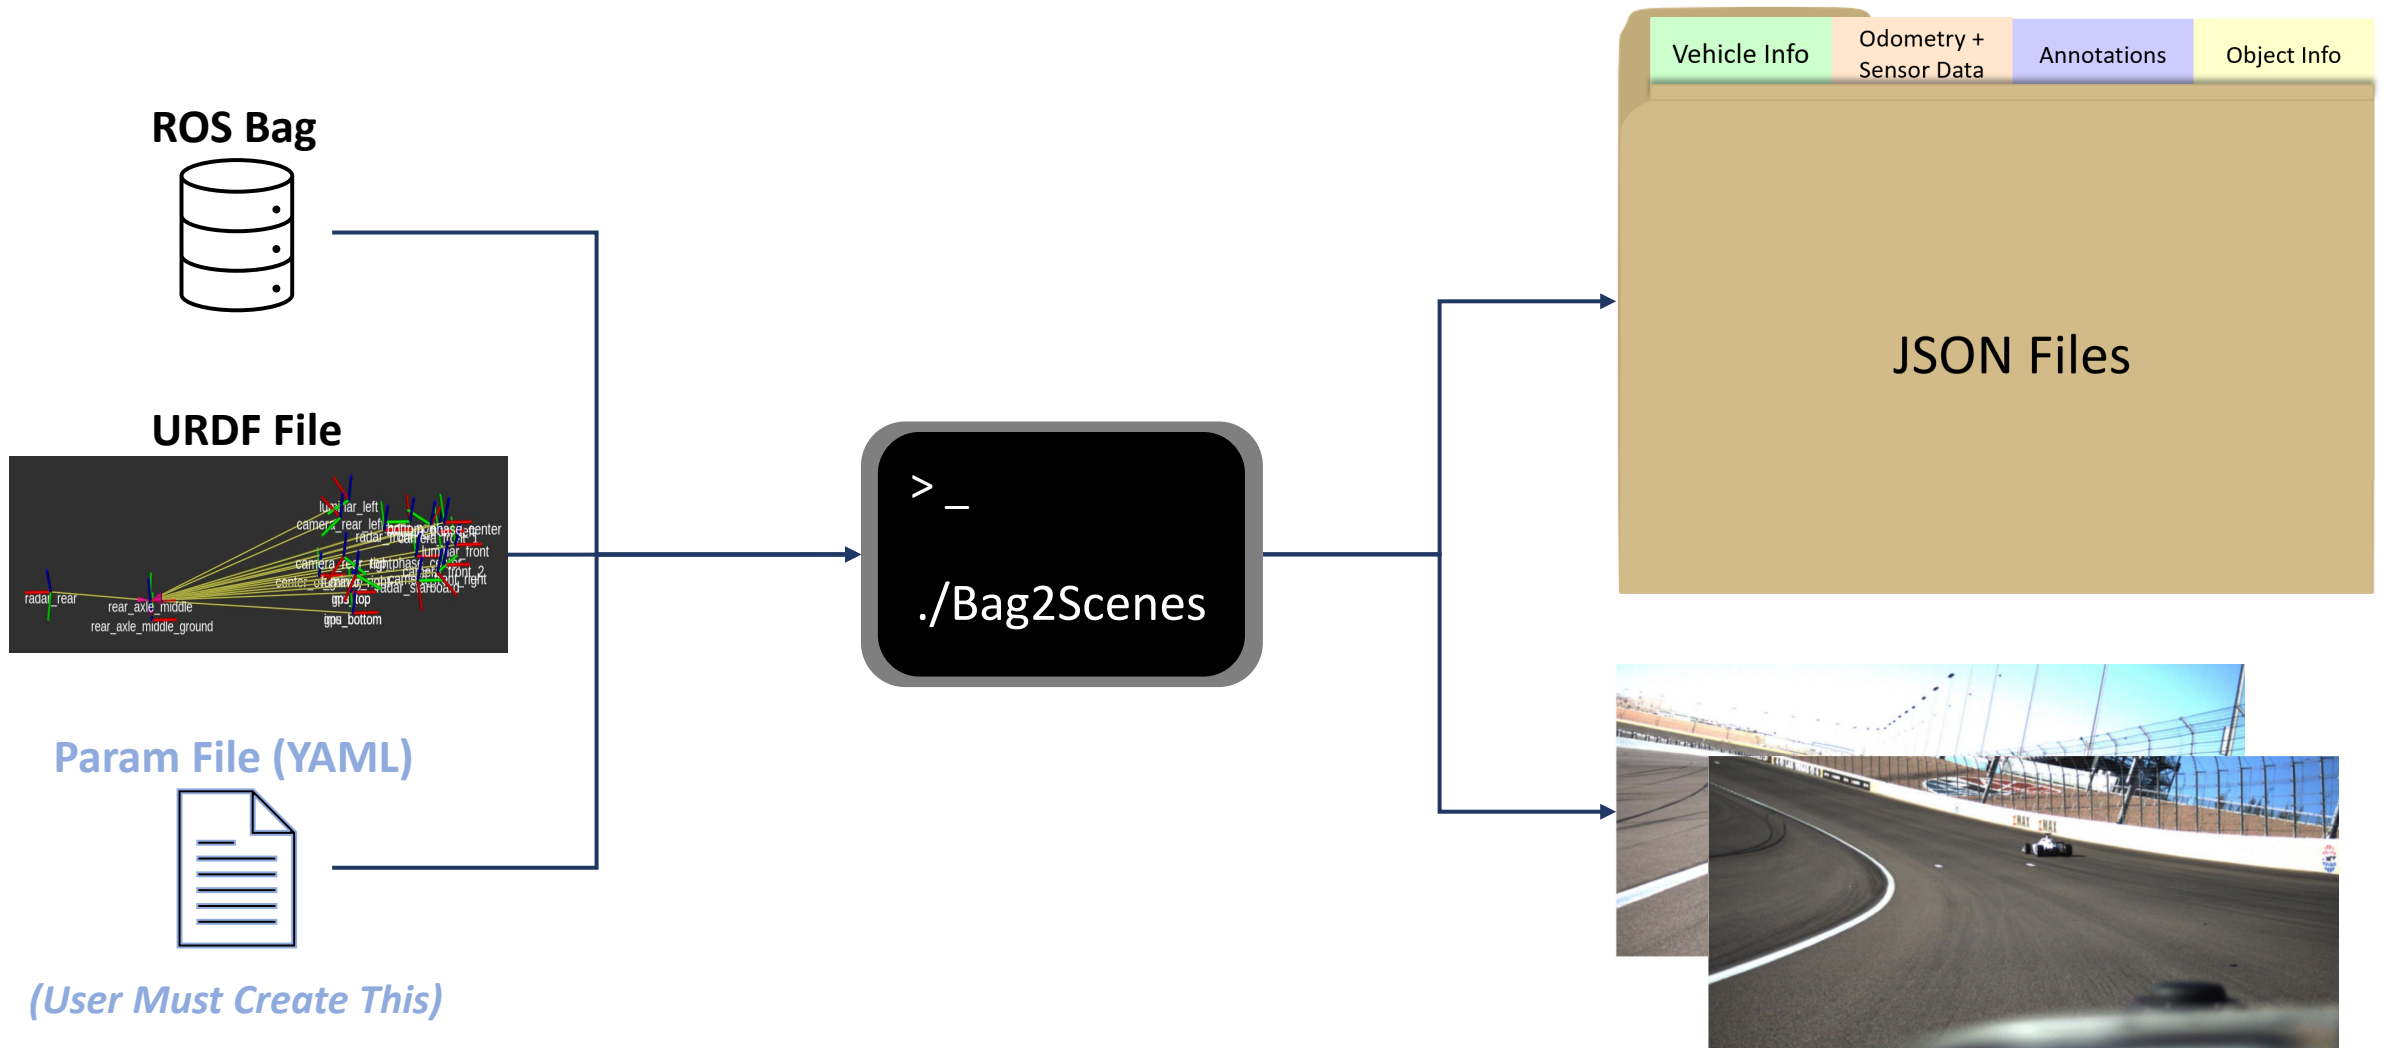

1 April 2020
nuScenes prediction and detection challenge at ICRA 2020.
Join the challenge and beat the state-of-the-art.

The nuScenes Dataset Format

The ROSBag2nuScenes API

Tutorial: Bag to nuScenes Param File

```
params > ! mit.yaml
```

```
1 BAG_INFO: 1. Provide context and ego odometry topic
2   TEAM: MIT-PITT-RW
3   DESCRIPTION: Low speed multi-agent laps with KAIST
4   ODOM_TOPIC: /vehicle_8/local_odometry
5   TRACK: IMS
6   URDF: urdf/av21.urdf 2. Provide path to URDF
7 SENSOR_INFO: 3. Provide sensor topics + frames
8   LIDAR_FRONT:
9     TOPIC: /luminar_front_points
10    FRAME: luminar_front
11   CAMERA_FRONT_RIGHT:
12     TOPIC: /camera/front_right/image/compressed
13     FRAME: camera_front_right
14     CALIB: /camera/front_right/camera_info
15   RADAR_FRONT:
16     TOPIC: /radar_front/esr_track
17     FRAME: radar_front
```

Tutorial: Bag to nuScenes

`./rosbag2nusenes {path to bag} {path to param} {output path} {num threads}`
