Get The Robot Into Simulation

Import from CAD data

Import from URDF

```
<!-- Dimension XSENS IMU -->
<xacro:property name="IMU_XSENS_dimension_x" value="0.0031" />
<xacro:property name="IMU_XSENS_dimension_y" value="0.0036" />
<xacro:property name="IMU_XSENS_dimension_z" value="0.0010" />

<!-- Dimensions of the Sick Tim 571 -->
<xacro:property name="sick_tim_dimension_x" value="0.01" />
<xacro:property name="sick_tim_dimension_y" value="0.01" />
<xacro:property name="sick_tim_dimension_z" value="0.01" />

<!-- Dimensions of the GPS Antenna -->
<xacro:property name="gps_antenna_dimension_x" value="0.01" />
<xacro:property name="gps_antenna_dimension_y" value="0.01" />
<xacro:property name="gps_antenna_dimension_z" value="0.01" />

<!-- Dimensions of the RealSense cameras -->
<xacro:property name="realsense_dimension_x" value="0.01" />
<xacro:property name="realsense_dimension_y" value="0.01" />
<xacro:property name="realsense_dimension_z" value="0.01" />

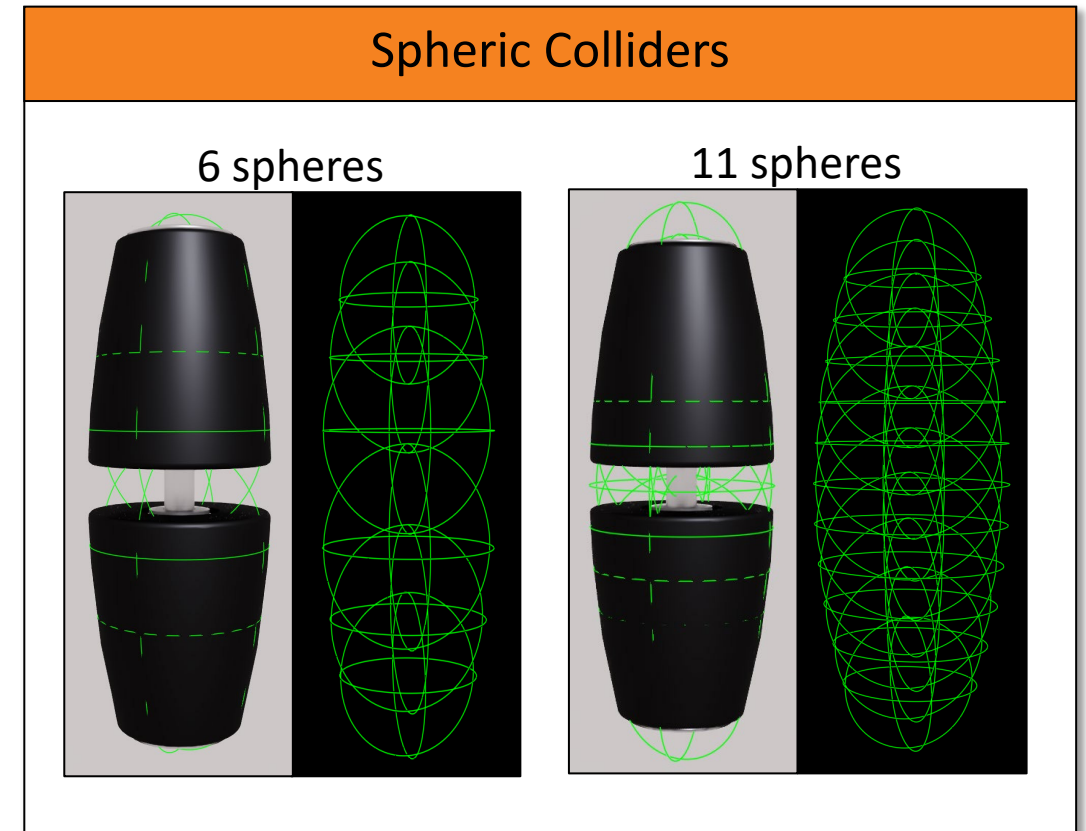

<!-- Include Robomaster Parts -->
<xacro:include filename="parts/base.xacro" />
<xacro:include filename="parts/laserscanners.xacro" />
<xacro:include filename="parts/imus.xacro" />
<xacro:include filename="parts/gps.xacro" />
<xacro:include filename="parts/wheels.xacro" />
<xacro:include filename="parts/gripper.xacro" />
<xacro:include filename="parts/cameras.xacro" />
```

Actuators & Dynamics

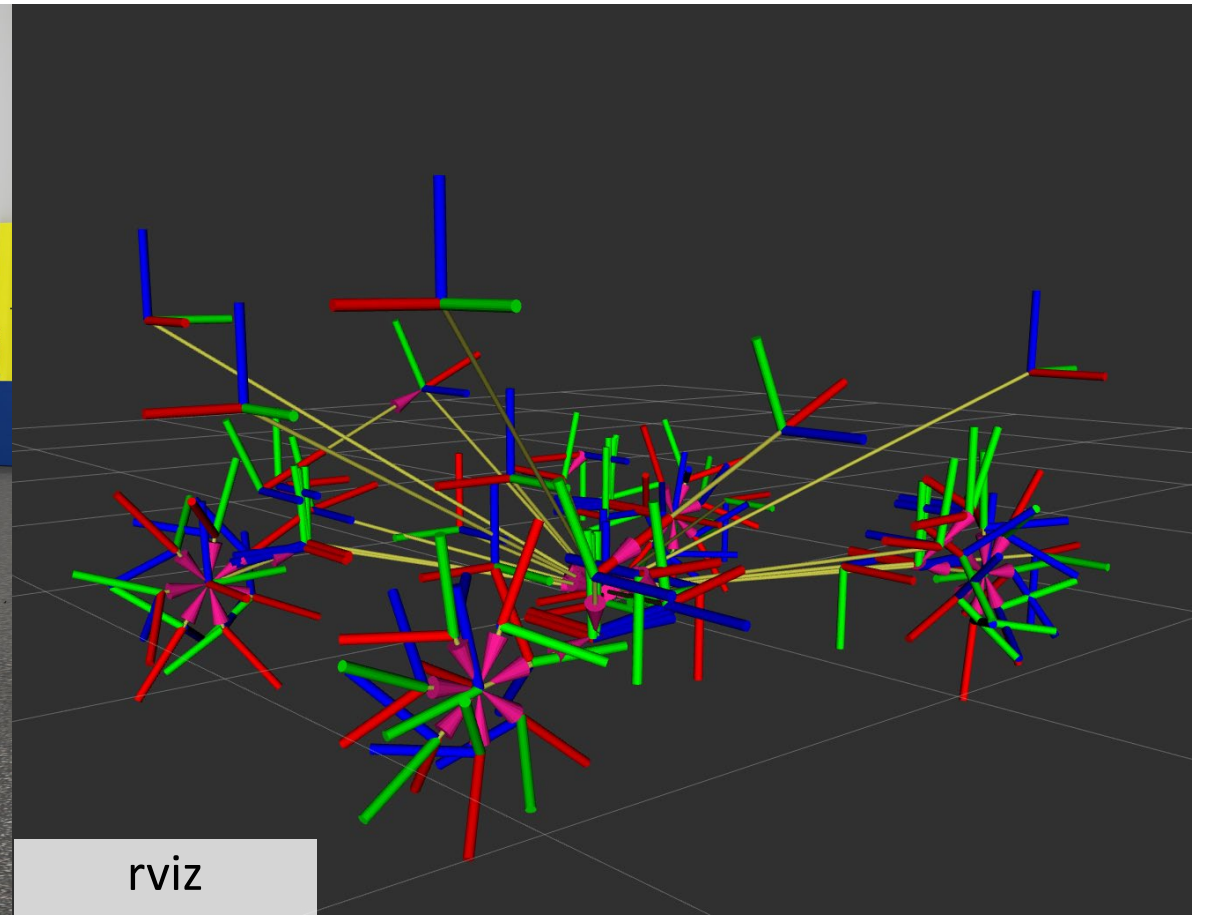

Smoothness is Key: The Roller Colliders

Actuators & Dynamics

Entering the ROS Ecosystem

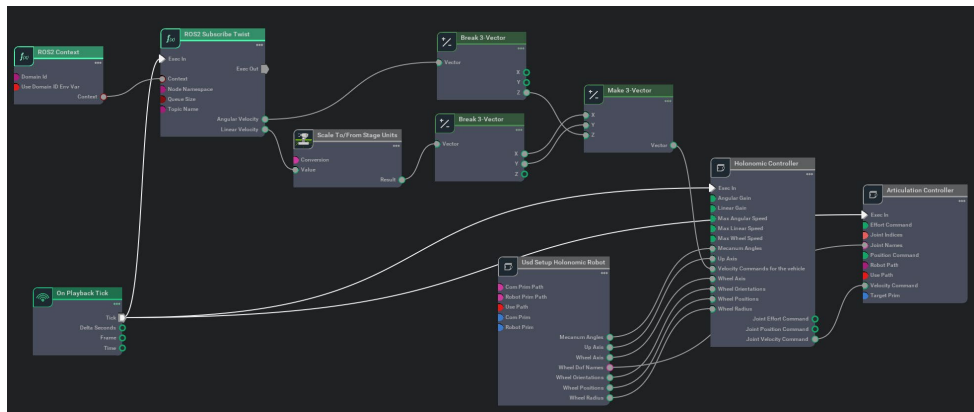

Actuators & Dynamics

The Robot Base Controller

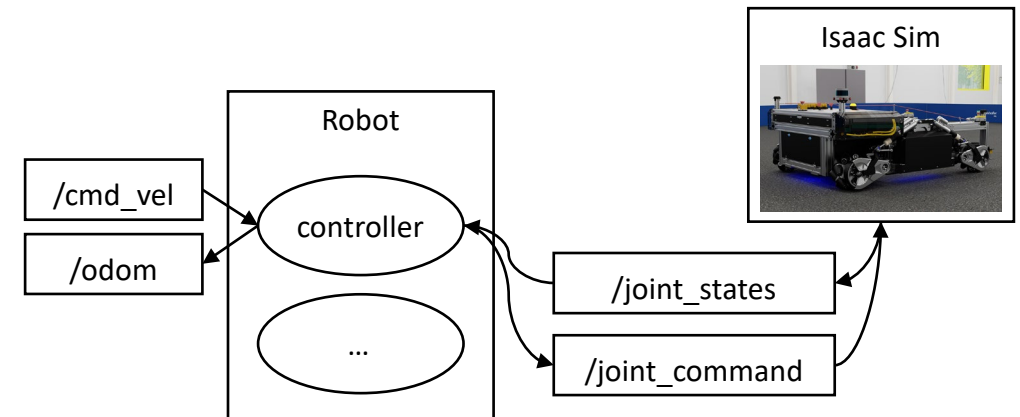

OmniGraph based Controller

- Controller can be built in Isaac Sim
- Visual Scripting Language OmniGraph

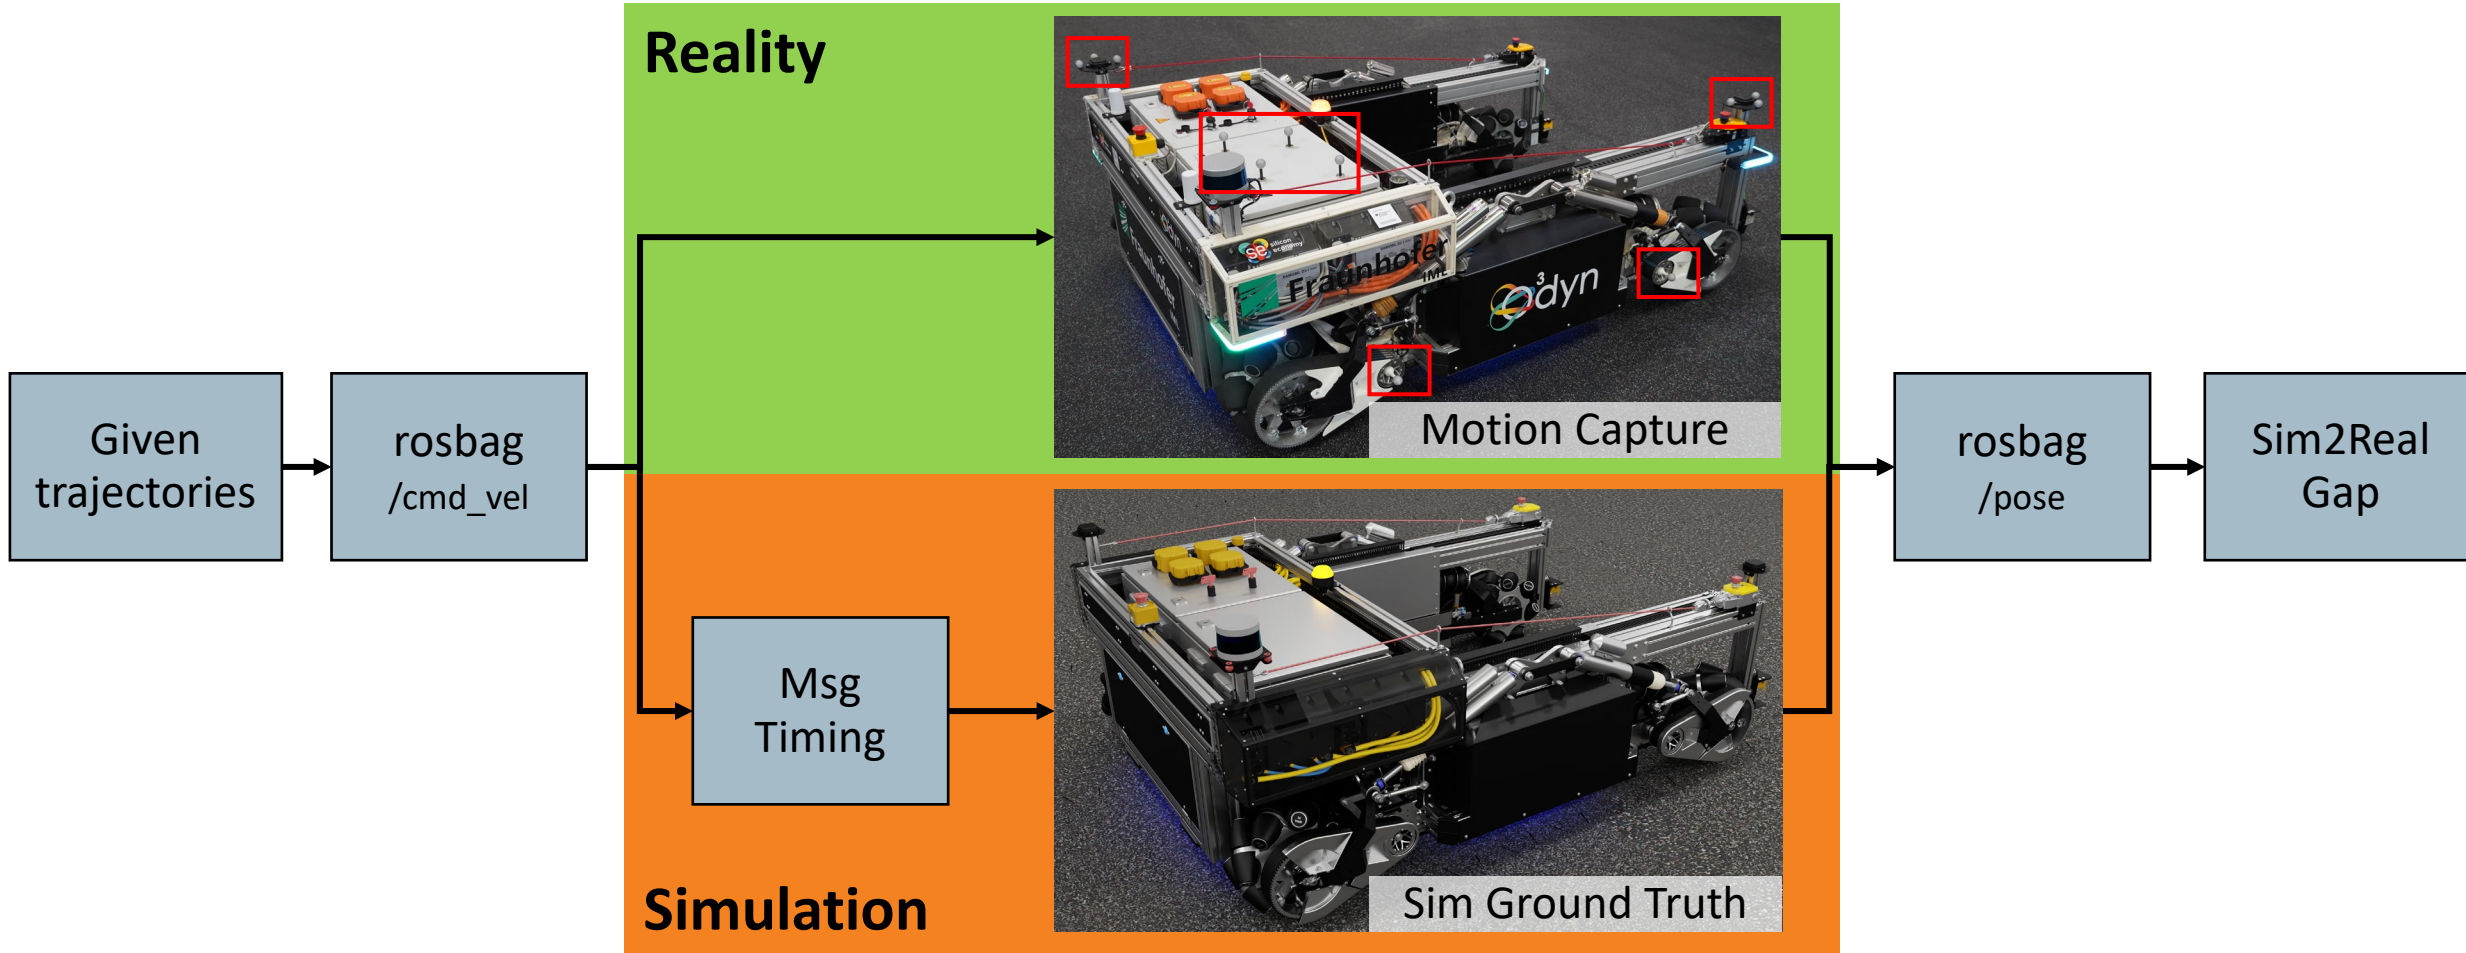

Custom Controller

- Implementation via ROS or Python API
- Controller node allows to implement robot specific dynamics & behaviors (e.g., delay)

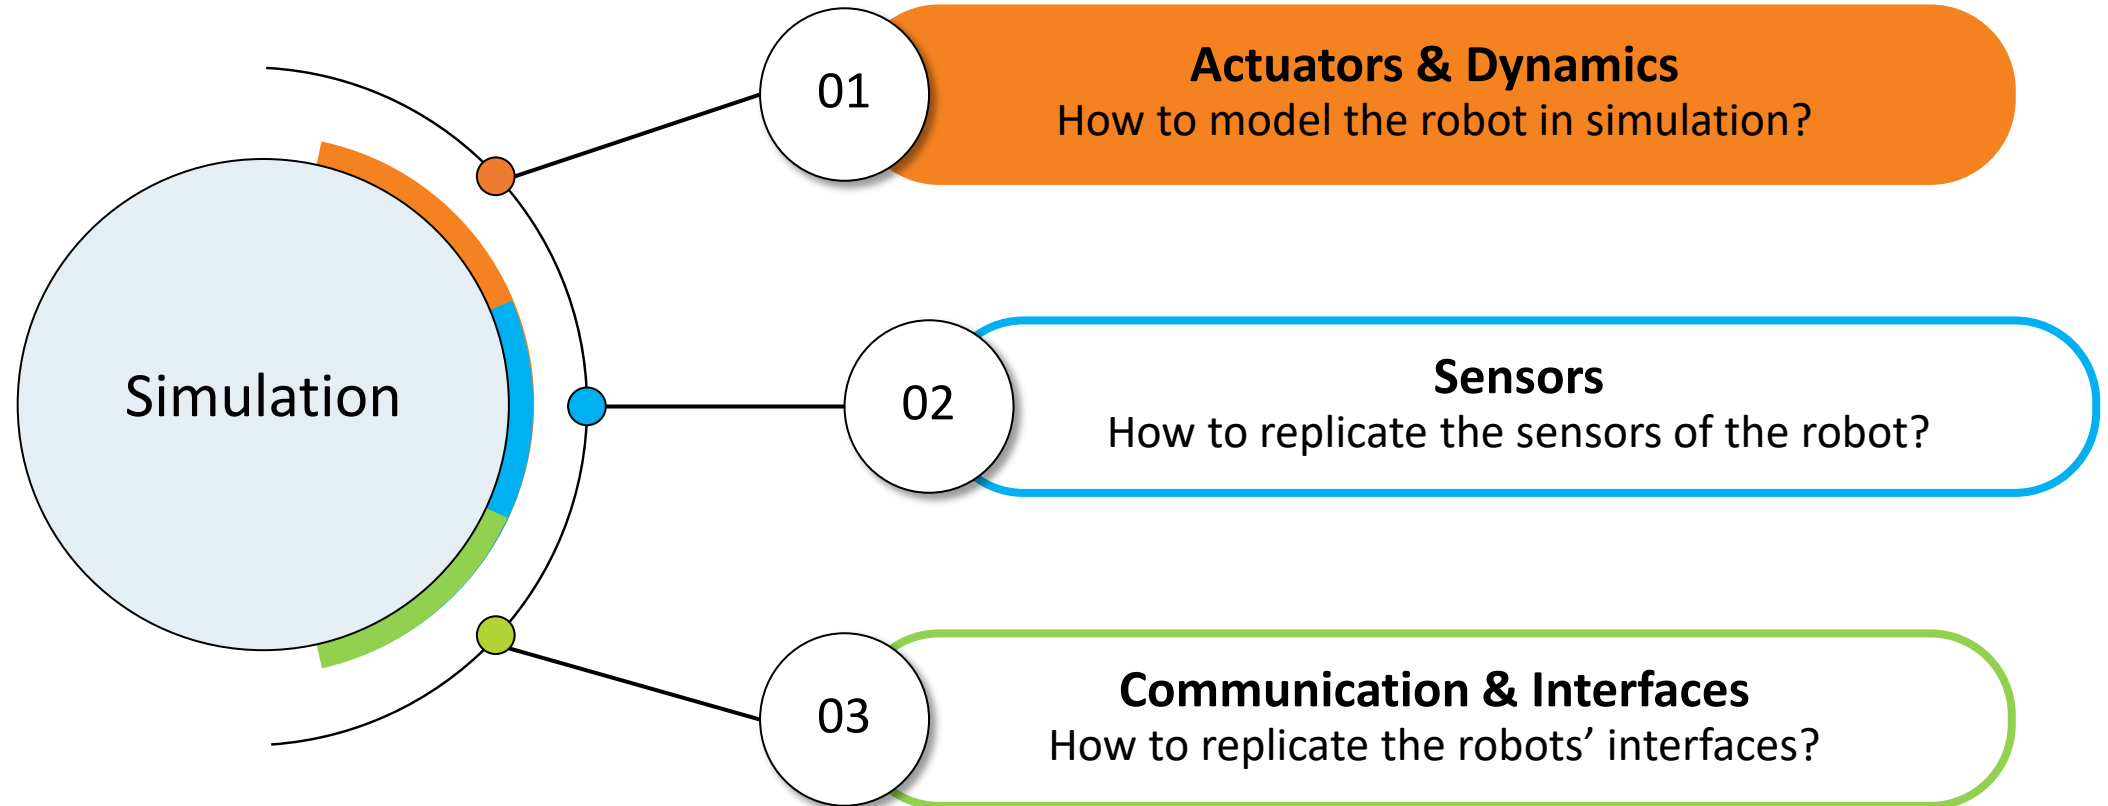

Sim2Real Comparison – Do They Behave Similarly?

Agenda

Agenda

Sensors

Available Sensor Types

Camera

- RGB camera
- Depth camera
- Replicator for synthetic data generation

LiDAR

- PhysX-based LiDAR
- RTX-based LiDAR

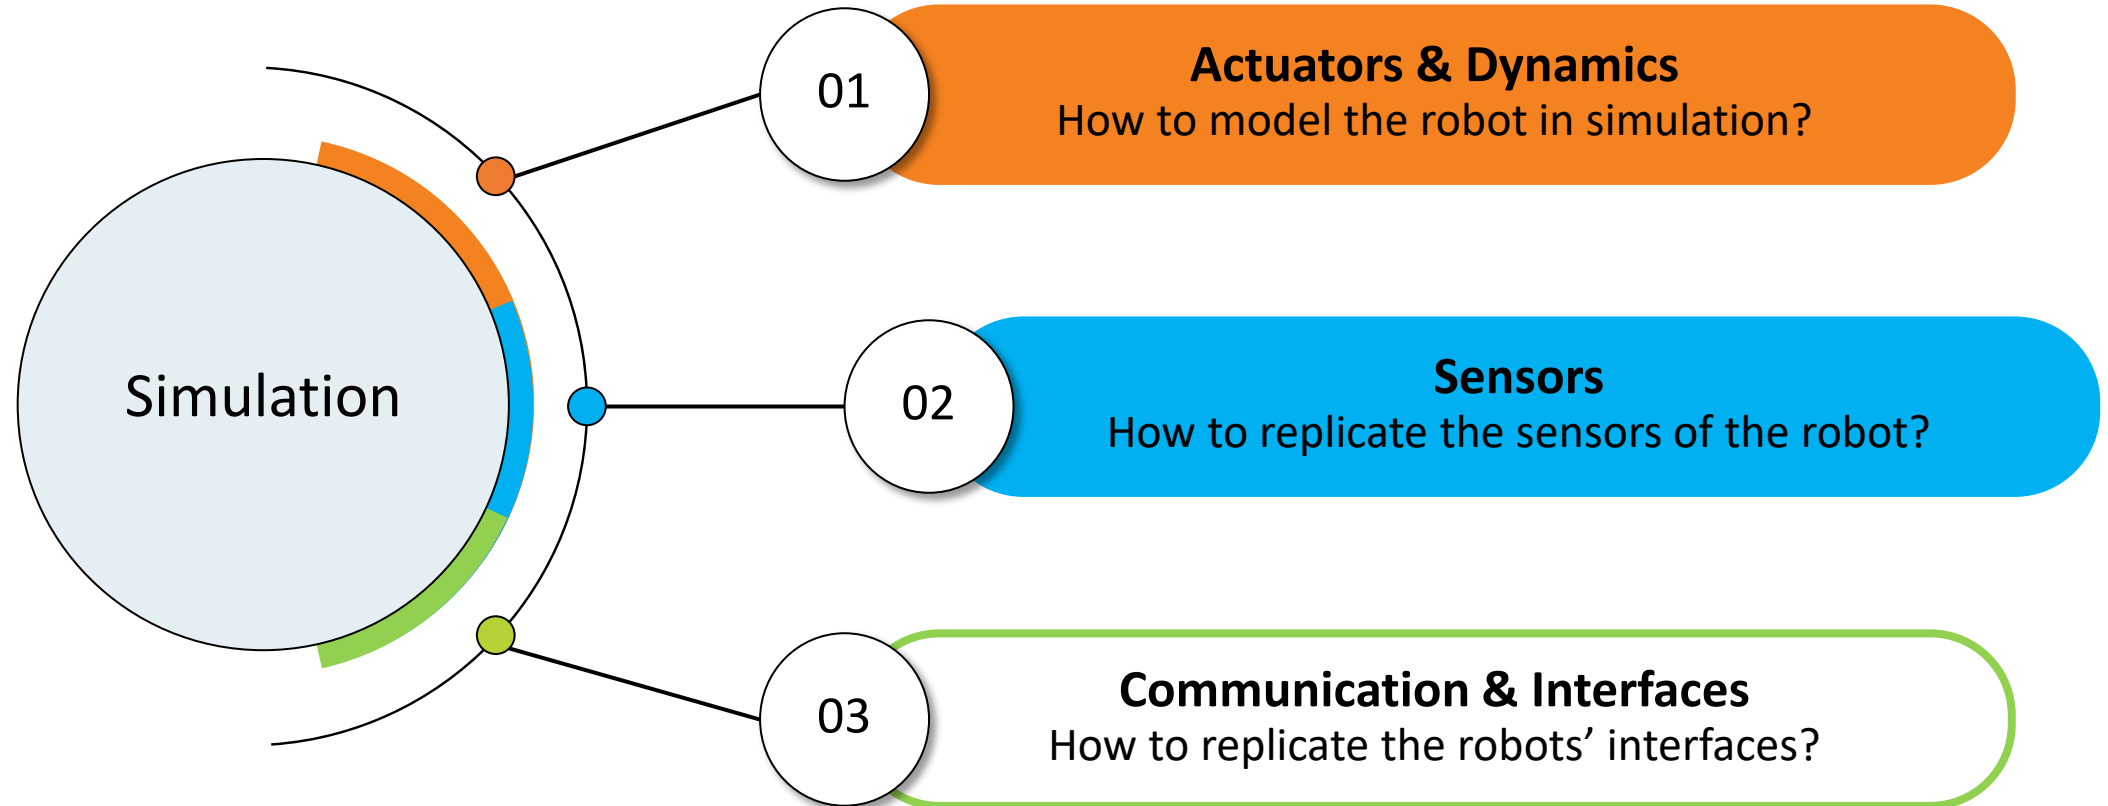

Others

- PhysX-based range sensors (generic, ultrasonic)
- Force and contact sensors
- IMU
- Proximity

Conclusion

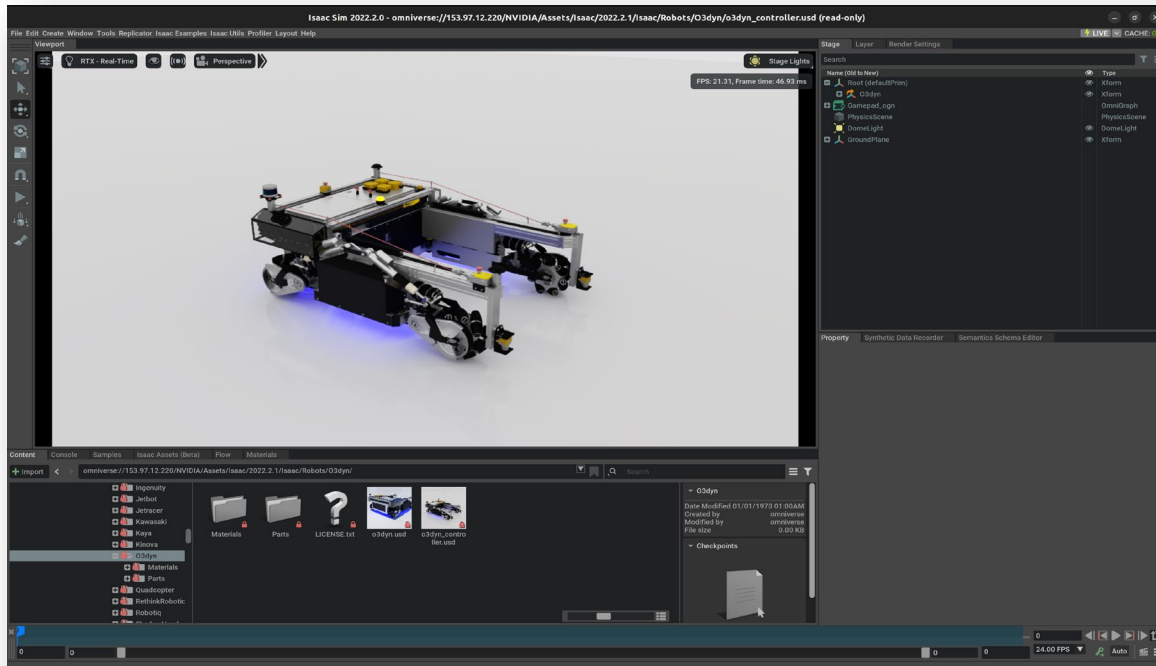

Simulation of highly dynamic robots is challenging – but possible!
Take care of the collider modeling and use real-world data.

Isaac Sim offers a lot for robotics and has its strength within the GPU usage mainly for sensor simulation and rendering.

ROS is the bridge between simulation tools and the reality.
