

The Past, Present, and Future of Navigation

Steve Macenski, Samsung Research America

N A V 2

Steve Macenski

Open-Source Robotics - Engineering Lead

- Your Friendly Neighborhood Navigator!
- ROS Technical Steering Committee Member
- Navigation Working Group & Project Lead
- Developed 50+ ROS & ROS 2 Packages

NASA Goddard (2015 - 2017)

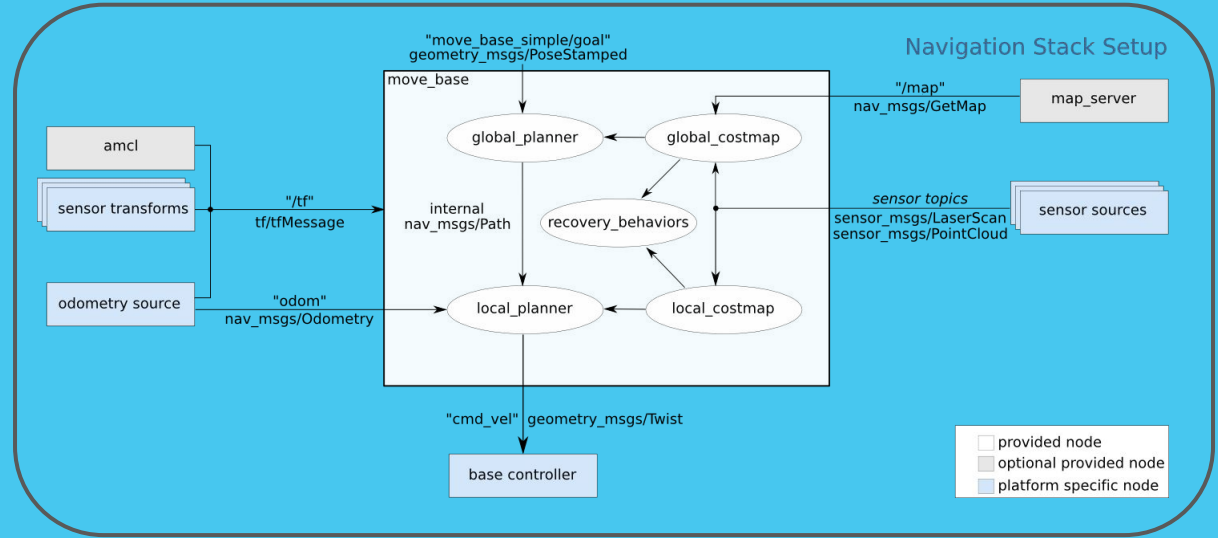

Simbe Robotics (2017 - 2019)

Samsung Research America (2019 - Present)

Overview

History of ROS Navigation

Motivations for Nav2

Nav2 and Current Users

Motivations for Nav2 - ROS 2

ROS 2

- Lessons Learned in 10+ Years
- Product Ready Middleware
- Quality and Reliability Focused
- Embedded / Real-Time Support
- Multi-Robot Teaming Capable
- Best in Class Security

Motivations for Nav2 - What's Changed?

Motivations for Nav2 - What's Needed?

Quality and Modernization

- Testing, Confidence, Reliability, Safety
- Professional Support and Documentation
- Leverage ROS 2 Features & Philosophies
- Re-Centralize Navigation Development
- More Independence In The Framework
- Updated Algorithms (Localization, Planning, Perception, etc)
- Product Features (docking, keepout zones, map editing, etc)

Overview

History of ROS Navigation

Motivations for Nav2

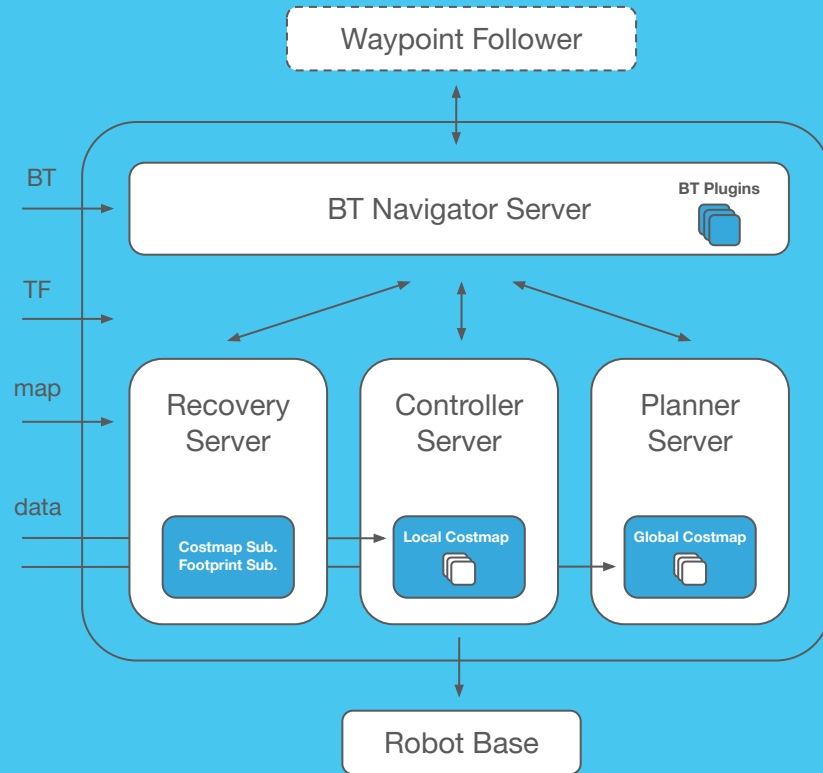

Nav2 and Current Users

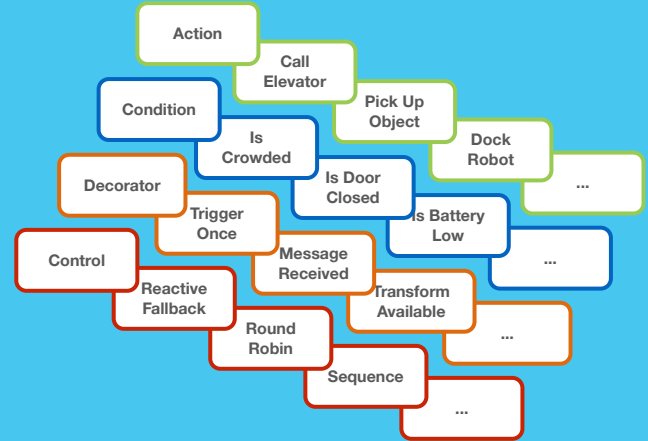

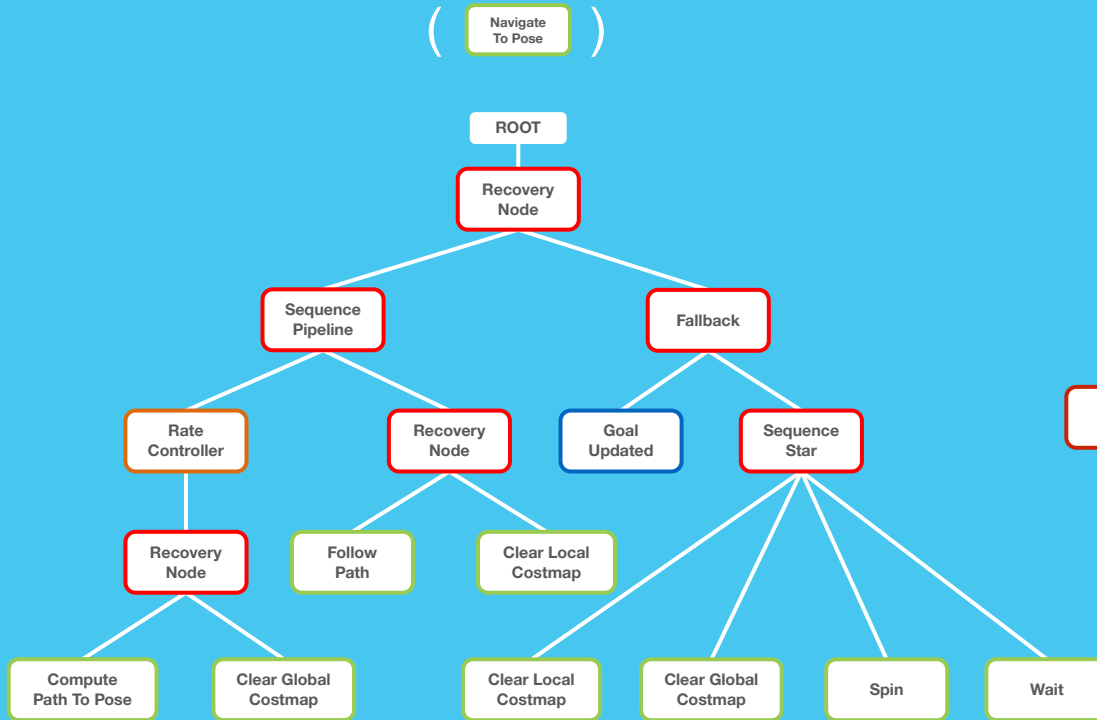

ROS 2's Production Solution

- Behavior-Tree Navigator
- Designed on Modular Servers
- Growing Features and Algorithms
- More Run-Time Selectable Plugins
- Support for All Robot Types
- Focus on Quality & Testing
- Easily Extensible

Behavior Trees

Nav2 Roadmap

1

Basic Service Robot Capabilities

The Marathon 2: A Navigation System.
IROS 2020, Finalist RoboCup Best Paper

2

Expand Support for All Bases

Circular and Non-Circular Differential,
Omnidirectional, Ackermann and Legged

3

Create Modern Product Features

Keepout, Speed Zones, Assisted Tele-Op,
Safety Nodes, Docking, Dynamic Obstacle
Processing, IPC, Demos & Documentation, etc

4

Extend Support for 3D and VSLAM

Support high-quality and improved 2D, 3D, and
Visual SLAM and Localization systems

5

Retool Terrain Models for Outdoor

Create swappable environmental models,
including cost and height maps for planar,
urban, non-planar, and outdoor environments

Nav2 Community

Navigation Working Group

- Bi-Weekly Meetings
- 7-20 People Per Meeting
- 115 Contributors
- 500 People on Slack

Why Get Involved?

- Professional Growth
- Reduced Risk
- Collaborate on Development
- Power to Steer the Project

Interested in Getting Involved?
