Organiser : ROSCon JP
Co-host : Open Robotics

Japanese official event for ROS developers : ROSCon JP

ROSCon JP is an event held each year for the local Japanese ROS community.

Also, it is an official ROSCon branch event which is licensed by Open Robotics in the US.

ROS (Robot Operating System) is originally developed by a company called Willow Garage in the US, it's use case is not only limited in an academic field but also in Industry segments. ROS is an open-platform for robots and it is globally used now.

Recently, ROS engineers' activities in our community is becoming more active. ROS study group which is our main activities were maintained even during the time of the COVID. The reiterated users in our study group is now listed more than 2500 people.

In 2022, iROS and ROSCon were held in Japan, this shows how energetic our community is.

ROSCon JP this year, we are planning to make it as an event to share knowledges about ROS related libraries, tools and deices. Moreover, it there will be technical talks, sharing ROS best practices and new technologies, as same as what the original ROSCon is doing.

The venue is the academic and research city of "Tsukuba".

Tsukuba City

Tsukuba City has been developed as the Tsukuba Science City since the 1960s and has become Japan's largest academic city. The city hosts numerous research institutions, and with the opening of the Tokyo Metro Tsukuba Express, the journey from Tsukuba Station to Tokyo's Akihabara takes as little as 45 minutes. It also offers excellent access to the Tokyo metropolitan area, making it a popular destination.

Venue : TSUKUBA CAPIO

〒305-0032 1-10-1 Takezono, Tsukuba City, Ibaraki Prefecture

Access: It is a 10-minute walk from Exit A3 of Tsukuba Station on the Tsukuba Express. After exiting at Sakura-Tsuchiura IC, it takes about 15 minutes.

The hall opened in 1996 and features a stage framed by the structure as seen from the audience seats. The Capiio arena is suitable for various indoor sports and gatherings. Through an audience seating arrangement that fosters a sense of unity between performers and spectators, as well as high-quality stage equipment, the hall can be used for full-scale theatre and dance performances. Other facilities include a medium-sized conference room, a small conference room and a rehearsal room, as well as refreshment rooms.
